

Which Do You Choose?

Choice. Value. Selection.

In corporate relocation, the transportation of household goods is the second highest cost element after homesale. With that in mind, Paragon created its Partner Select Program to improve its international freight forwarding service for our corporate clients while maintaining the highest level of service at pricing that is verifiably lower. To implement this program, we first selected best-in-class providers of international freight forwarding that can provide the highest service levels, but at the lowest price. The pricing component involves a process where each move is actively bid on by three of Paragon's best-in-class partners using one survey completed by one of the partners. This essentially eliminates the burden to the assignee of having to schedule multiple surveys. Paragon's Partner Select Program has been proven successful in lowering costs for our clients from **\$2,982.44** to **\$6,419** per move and service results to date are **100% rated "good" to "excellent."** Contact Paragon today and see how our Partner Select Program can help you cut costs while maintaining superior customer service.

The Partner Select Program...just another reason why Paragon is **"The Best Thinking in Relocation."**

Contact Paragon today to find out how our Partner Select Program can save you money.
